PROJECTS

React MERN blog

I developed this project to try out Back-end part of website development, and to practice my Front-end skills.

Technology Stack: NodeJS/ES6, Express + validator, MongoDB + Mongoose, JSON Web Token, Multer, BCrypt on **Back-end**.

ReactJS, Redux toolkit, React Hook Form, React Router, React Markdown/ Simple editor, Axios on **Front-end**.

GitHub repositories: [Front-end](#), [Back-end](#).

View Project: [Website link](#).

React Sneakers

It is an online store application I developed to practice my Front-end development skills.

Technology Stack: ReactJS + hooks, React Router, Axios, SCSS, React Context, React Skeleton.

GitHub repositories: [Repo link](#).

View Project: [Website link](#).

Twenty Nine Months

This is a web page I created for my boyfriend and presented at the day we were 29 months together.

Technology Stack: HTML, CSS, JavaScript, Bootstrap.

GitHub repositories: [Repo link](#).

View Project: [Website link](#).

SKILLS

HTML, CSS (SASS, SCSS), JavaScript.

React (React Router, React Hook Form), Axios, Redux toolkit.

Linux(Terminal, Unix commands), Version Control(Git).

Algorithms and data structures.

AWARDS

European Girl Olympiad in Informatics 2021, Bronze medal.

Belarusian Republican Olympiad in informatics 2022, Bronze medal.

EDUCATION

Competitive Programming School, Belarus, Vitebsk

September 2016 - May 2022

Studied data structures, algorithms, estimation of the asymptotic complexity of the program and optimization methods. Applied those skills taking part in various team and individual competitions.

[Meta Front-end developer](#) professional certificate, Coursera — *Certificate*

September 2022 - May 2023

Studying Front-end development in depth.
